

# ACOUSTIC POLYESTER PANELS

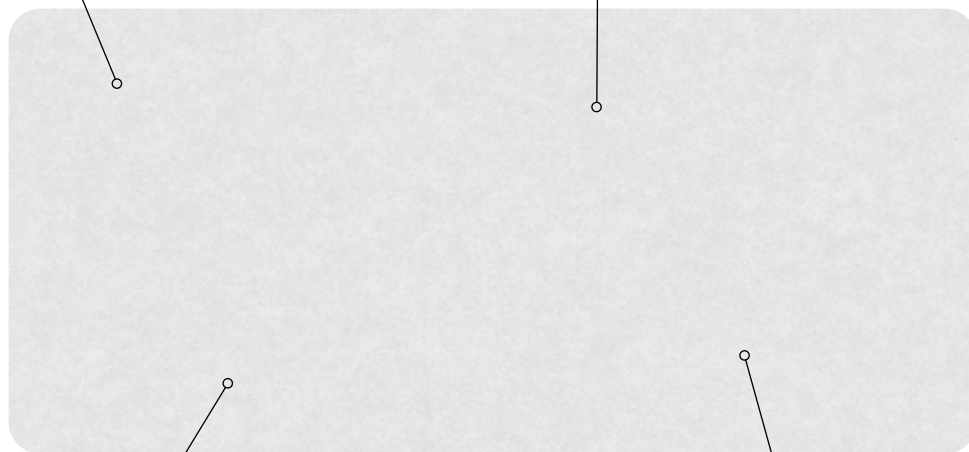

Acoustic polyester panels (PET), made from **70% recycled material**

To produce **1 panel**, approximately **120 PET bottles** with a capacity of **1 liter** are needed

*This is a significant gain for the environment, as thanks to our efforts, this plastic will not become waste*

CLOUD

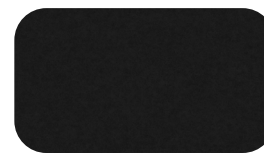

The production of panels takes place **in Poland**, significantly reducing the **carbon footprint**

*It will be considerably lower compared to any other similar product on the market*

The material used in Spectra's panels has been **tested and certified** by a Polish construction product certification unit

*The material used in Spectra panels has been tested by a Polish certification unit for construction products. It is a flame-resistant material, making it suitable for use in commercial facilities such as offices and hotels, as well as hospitals, schools, preschools, and private interiors*
